Stretchwrapper

Features

- Up to 300% pre-stretch
- Steel plate turntable surround
- EZ-Load film carriage
- Load-cell controlled film tension
- Lifetime warranty on pre-stretch rollers
- Compact footprint

Model Defender LP DT

Semi-automatic Low-profile Turntable Stretchwrapper

Used where productivity levels require higher throughput than one machine can provide. The Defender LP DT allows the operator to wrap one load while loading or unloading the other turntable – without the expense of purchasing two machines.

The low-profile dual-turntable version provides a significant increase in product throughput while still allowing the operator to load and unload using pallet jacks or forklifts.

Specifications

Electrical Supply	110v, 1 phase, 15 amp
Load Size	52" x 52" x 90" high
Load Weight	4,000 lb maximum
Production Rate:	Up to 60 loads per hour Depends on load configuration

Distributed By:

Standard Options

- Ramp
- 30" film carriage
- Larger load sizes
- 6'000lb capacity turntable
- Automatic film cutter
- Cold temperature package

Features

Designed with safety in mind

- No pinch-points on tower
- Operator controls away from all moving components
