

VS32 Steel Strapping Head

- For use with steel strapping up to 1 ¼" wide.
- Double Spot weld joint, up to 90% efficiency
- Pneumatic configuration
- No transfer of heat onto the package during the welding process

VS11/12 Steel Strapping Head

- For use with steel strapping up to ¾" wide.
- Achieve up to 90% joint efficiency
- Available in sealless and spot weld joint
- Full penetration welding even in case of corroded and lacquered straps

VK 30 Polyester Strapping Head

- Heavy duty strapping head
- Direct drive system delivers high tension with no belts or clutches
- Fastest heavy duty strapping head on the market
- Precision thermocouple heater-blade control allows consistent seals regardless of ambient temperature

Fully customized non-ferrous metal applications for packaging and material handling for aluminum, brass and copper.

Lift and turn tables eliminate damaged coil edges

Equipment Solutions for Metal Service Centers

Material Handling and Packaging Solutions for Metals Processing

Features

- Seal-less, Seal type, Spot weld Strapping heads in Electric, Hydraulic and Pneumatic configurations
- AAR approved equipment, steel & plastic strapping
- Comprehensive parts availability, On-site equipment training, Preventative maintenance programs
- On-site service technicians for installation supervision and new equipment commissioning
- Standard and Custom designed Strapping machines and Material Handling Systems
- Technical Field consultants, Mechanical, Electrical design service
- Manual and pneumatic strapping tools
- 24/7 performance and reliability

Coil Centering Stacking Conveyor

Samuel Strapping Systems specializes in the design and manufacture of custom automatic strapping machines and material handling solutions for the metals processing industry. Applications ranging from slit coil banders in service centers, to circumferential and through-the-eye banders for large coils, Samuel Strapping has successful systems in use around the world.

Working with suppliers of the world's finest strapping heads, Samuel Strapping is able to offer the best solution to all strapping requirements. Service and parts on every machine sold are available directly from Samuel Strapping.
