PROVEN PACKAGING AND MATERIAL HANDLING SOLUTIONS

SAMUEL STRAPPING SYSTEMS - EQUIPMENT DIVISION

CREATING SOLUTIONS FOR THE FUTURE

The engineering and fabrication employees of Samuel Strapping Systems Equipment Division are seasoned professionals that have built mill-quality material handling and packaging equipment for primary and secondary industry for decades.

- Tier-One and Tier-Two Automotive
- Lumber and Panel
- Primary Metals
- Metal Services
- Paving-Stone and Block
- Clay Brick
- Can and Bottle Manufacturing
- Paper Manufacturing and Converting
- Corrugated Sheet and Box Manufacturing
- Distribution and Logistics
- Food and Beverage
- Commercial Printing

All these industries have taken advantage of our vast experience, reduced costs and increased productivity through automation designed specifically for the end-user.

“The Samuel Equipment improved our uptime dramatically, saved money by converting us to polyester from steelstrapping and helps us produce more pavers per production hour.”

- Mark Peterson, Vice President
Willow Creek Concrete

“ We selected Samuel Strapping Systems simply on their ability to provide exactly what we needed. Samuel was the only company capable of supplying a complete packaging system solution, including the full automation package, as well as the hardware, featuring innovative technology such as spot-weld strapping heads, from one source. No other vendor could offer this to us. Working together with Samuel allowed us to achieve a successful installation of two packaging lines, with minimal interruption to product flow.”

- Joe Maggini, President, Magic Steel Corporation

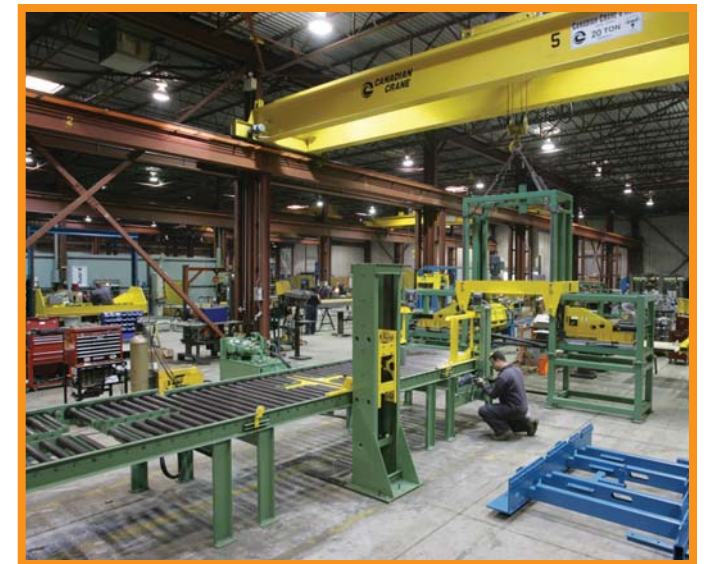

“The Samuel strapping equipment paid for itself in less than six months.”

- Keith Waldron,
Proctor and Gamble in Iowa

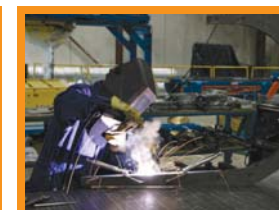

WHY SAMUEL STRAPPING SYSTEMS? HISTORY SHOWS PROVEN RESULTS

Since 1855, Samuel companies have been servicing businesses across North America. The Equipment Division's 65,000 square foot facility north of Toronto remains unique because it allows the opportunity of assembling and testing automation on large automated material handling lines before they reach the customer's plant. Simplified commissioning is just one of the benefits provided to our customers at our facility.

- Extensive inventory supply to support customer operations
- Turnkey systems capability
- On-site, mechanical and electrical engineering staff members
- Machining, fabrication, assembly, testing and packaging done in-house
- Field support technicians for installation, start-up and after-sales service
- Exclusive factory-authorized support for Titan spot-weld steel and plastic strapping heads

Call one of our equipment specialists today or visit us online at www.samuelstrapping.com and find out how we can improve productivity and reduce your cost of doing business.

EQUIPMENT DIVISION

PROVEN PACKAGING AND MATERIAL HANDLING SOLUTIONS

Products/Services

- Steel, polypropylene and polyester strapping
- Seals
- Heavy duty industrial unitizing systems
- Heavy duty steel and plastic strapping heads
- Manual and pneumatic strapping tools
- Semi and fully automatic strapping machines
- Product identification equipment
- Stretch wrap machines
- Stretch wrap
- Balers and Compactors
- Baling Wire
- Case sealers
- Cutters
- Dispensers
- Edgeboard
- Dunnage bags
- Scrap choppers

Samuel Strapping Systems is your complete single source supplier for all of your packaging and unitizing needs. We are customer and market driven, focusing on timely, value-added packaging solutions to satisfy the current and future needs of our customers. Together with our highly skilled employees, modern manufacturing plants and our responsive customer service and sales force network, we are committed to providing our customers with innovative, high quality, cost effective packaging systems and solutions.

Samuel Strapping Systems manufactures and supplies a broad range of steel and plastic strapping, hand tools, edge protection, stretch film equipment and consumable, as well as standard and custom engineered unitizing equipment. Our comprehensive in-house research and engineering capabilities, with state-of-the-art CAD systems technology, offer customers complete packaging and unitizing solutions from a single source. Samuel's engineering and sales expertise takes customers' unitizing requirements, from the initial concept, through to fabrication and installation.

Our products and systems can be found in virtually every industry and are supported by a comprehensive sales, customer service and distribution network.
