

A380

PNEUMATIC COMBINATION STEEL STRAPPING TOOL

Features

- Ruggedly designed high performance strapping tool meeting the requirements of the most demanding applications.
- High reliability reduces down time; easy to service.
- Easy simultaneous loading of both straps and pneumatic operation increase productivity considerably.
- The sealless joint reduces the overall strapping costs by approx. 10% through the elimination of the seals.
- Pneumatic tensioning guarantees even tension of all straps applied.

A380

Pneumatic Sealless Steel Strapping Tool

Standard Features

The A380 is used mainly in the timber and construction material industry. The massively constructed tool is characterized in particular by its reliability in shift work and with continuous operation under the most rigorous conditions. Supplied as a semi and fully automatic model, it is also produced in four tensioning levels. It is recommended to use the tool in suspended mode.
